

NICE SERIES™ LOUNGE / TOWER / CUBE

As a first of all decoflame® models, the Nice™ Series offers great versatility in use as either a free-standing fire column or a mobile table-top fire: The burner is simply lifted out of the vase and can then be placed on any solid, level surface.

Nice™ is designed to add the cosiness and wild romantic of an open fire to long summer nights in your garden, on your terrace or anywhere indoors. The decoflame® Nice™ comes in three heights (the taller Tower, lower Lounge and Cube) and is available with vases of various colours in high gloss and also with a woven structure.

The decoflame® Nice™ burner featured in these models is made of brushed or polished stainless steel and white or black powder-coated steel and is shielded by an optic white glass surround of 8mm thickness.
